A FEW WORDS ABOUT THE DIAMOND GROUP

Leading manufacturer of stainless steel food service products and custom millwork,
for restaurants, cafeterias, laboratory, medical, and retail solutions.

WE CREATE THE DIFFERENCE

We innovate!

**We produce limitless creative
and unique designs and products,
driven by the imagination.**

For over 85 years, The Diamond Group has been the leading North American manufacturer of stainless steel food service products. Harnessing their expertise in stainless and expanding into millwork, The Diamond Group has evolved into a distinguished designer, manufacturer & supplier of case and display fixtures, laboratory & medical equipment, and custom retail merchandising solutions. From inception to completion, we are a team of highly skilled designers, engineers, precision welders, sheet metal workers, millworkers, and finishing professionals, for every phase of the project.

CORE STRENGTHS & CAPABILITIES

INDUSTRY SPECIFIC EXPERTISE

We offer the utmost quality, service and value to each of our customer's industries.
With 85 years of innovation, the Diamond Group is there with you to help with your challenges.

WE INVEST IN OUR SKILLS

We constantly re-invest in our capabilities to remain at the forefront of industry trends and evolution. Our team has a pulse on the latest market trends, innovation, and technological developments.

THE DIAMOND DIFFERENCE

As a family owned and operated business for over 85 years, we pride ourselves in offering personalized attention from project inception to the precise details of the installation process. The company controls all aspects of the manufacturing process, taking ownership and responsibility which allows all parties the assurance that their interests are priority.

SKILLED WORKFORCE

From inception to completion, we employ a team of highly skilled designers, engineers, precision welders, sheet metal, millworkers, and finishing professionals, for every phase of the project. Most factory technicians have tenure exceeding over 20 years, resulting in comprehensive knowledge and experience to handle any challenge.

CUSTOM FABRICATION

With experienced designers and engineers, and adaptable manufacturing capabilities, we can produce limitless creative and unique projects, driven by the imagination. With our established expertise and experience of large and small-scale projects, across multiple industries, and in numerous countries, projects can be tailored with precision.

MANUFACTURING TECHNOLOGY

Technological competencies include fiber-optic laser cutting and perforation, TIG welding, metal treatment, electroplating, powder coating, and sophisticated polishing. Incorporating various materials such as acrylic, granite and quartz, glass, and wood are handled with specialized tools such as diamond cutters, precision cutting, water jet, and high-speed milling machines.

MILLWORK, ACCENTS AND FINISHES

Beyond specific requirements of functionality lies the charm of equipment dressing. Equally important are the details of display and consumer interaction. A focused attention to detailed finishes, forms and materials is incorporated into each project, interpreting the client vision. A multitude of the finest millwork and finishing capabilities can enhance the mundane to magnificent.

SALES, SUPPORT AND CLIENT CARE

Our solid reputation is built on meticulous attention to detail with every product. The sales force brings decades of experience in food-service design and application. Leveraging proficiency into our businesses, we have an understanding of the regulations and standards applied to each industry. After-sales follow-up, support and service is vital to maintain our reputation and ensure our success.
